## **DETAILED ACTION**

### **Remarks**

1. In response to communications files on September 5, 2006. Claims 1, 12, 31, and 35-36 are amended per applicant's request. Therefore, claims 1, 6-12, 15, and 17-36 are presently pending in the application.

### **Reasons for Allowance**

2. Claims 1, 6-12, 15, and 17-36 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: the prior arts of records, neither anticipates nor renders obvious the following limitations as claimed:

As to claims 1, 12, 31, and 35-36, the prior art of records fail to anticipate or suggest a content management system for media publishing, comprising:

a plurality of content management tools for managing media contents during a publication process, the plurality of content management tools providing transcoding to convert a format of a selected media item to a specific target format of a media slot corresponding to said selected media item;

a publishing pipeline configured to operate in concert with the plurality of content management tools during the publication process to control development, distribution, and access of the media contents,

wherein the publishing pipeline provides a plurality of environments for staged and organized development and publication of the media contents, the plurality of environments

Art Unit: 2164

including a development/production environment, a staging environment, and a live environment; and

a producer configured to generate and edit templates of media items and associated data when the plurality of environments is in a development/production environment;

wherein each template of the templates includes a number of media slots, and each media slot defines a genre of media and a specific target format that is accepted by the each media slot, and

wherein the format of said selected media item does not need to match said specific target format of said media slot corresponding to said selected media item because said transcoding by said plurality of content management tools provides the conversion of the selected media item format to said specific target format, together with the other limitations of the independent claims.
